

OUTLOOK FOR ROCHESTER.

The Northern Pacific May Build Into This Old Camp.

According to the Butte Inter-Mountain, the recent decision of the Northern Pacific people to build a branch of that road down the Ruby valley from Gaylord to Twin Bridges with a promise of a further extension of the line at a later period, has been a great encouragement to the miners of the Rochester district.

Rochester, which has been a neglected place for many years, promises to boom this summer and autumn as one of the most important gold and lead districts of the state. Since the Northern Pacific people announced their intention to build the road, a number of Helena capitalists have been figuring on constructing a smelter at or near Twin Bridges to work the lead ores of the Rochester district and the gold and silver ores of the Helena district.

There is more activity in the Rochester basin this spring than at any previous time. The Helena and Rochester people are working on the line at a rapid pace. The Helena and Rochester people are working on the line at a rapid pace. The Helena and Rochester people are working on the line at a rapid pace.

Edward Mueller is making preparations to start his concentrator below Rochester this summer. He is shipping his first load of ore to the Anaconda smelter. The ore is being shipped to the Anaconda smelter.

Louis Des Rivieres is working the Old Glory on the Seap gulch side, and has a prospect of making a big strike. He is working on the Seap gulch side.

Little & Harvey of Melrose have been working on the Way Up all winter and has a carload of rich horn silver ready for shipment. They are working on the Way Up all winter.

Charles Harvey, manager of the Helena camp, has been working on the Seap gulch side. He is working on the Seap gulch side.

Purgatorial Pills.

The drugist would hardly smile if you asked for "purgatorial pills." There are many of them. But he would probably recommend a pill that did not gripe; a sugar-coated pill, gentle in action, and sure in effect. What are they called?

Ayer's Cathartic Pills.

AT THE TABERNACLE.

THE LIFE OF CHRIST AND THE RESURRECTION.

Discourses Yesterday Afternoon by Elder Charles W. Penrose and Elder Benjamin Goddard.

Elders C. W. Penrose and Benjamin Goddard were the preachers who spoke at the tabernacle yesterday. The sermon was chiefly upon the life of Christ and the significance and portent of the resurrection.

Elder Goddard said, in the beginning, that this was an especial day when the minds of all Christians should dwell upon the risen redeemer. The Latter-day Saints have no flowers here to typify that greatest event in the world's history. Yet the people give him the offering of a pure faith and a testimony of his divinity and his truth.

He performed wondrous miracles to demonstrate that he was one having authority to preach himself as the world, and we love him because he first loved us.

Latter-day Saints recall upon this day the marvel of his work in Gethsemane and Calvary. We recall how he left them when they were assembled on Gethsemane and passed through the intense agony which he endured for our redemption. Further, there was the picture of Christ crucified and the picture of the resurrection.

His resurrection showed that his work had only begun. A great work also depended upon the apostles, and he sent them as messengers to all the world to preach the gospel in all nations and to all creatures. Then all the people rejoiced and reverence for his name prevailed in all nations.

The knowledge of this people is not confined to the days when he walked among men at Lebanon. The people know that Christ has again come to the world in the last days to delegate his authority again to men, before the end of the last great dispensation.

The Latter-day Saints, by reason of this personal vision, are blessed above all other people, and have a cause to rejoice. The messengers of this people are carrying to the world what the early apostles of Christ proclaimed and are publishing the gospel among all nations.

Elder C. W. Penrose, who followed, recalled the life of Christ, and the services were over as disrespected and annoying. People apparently, he said, did not understand the Latter-day Saints as a people, but as a people of the world.

Referring to the remarks of Elder Goddard, Elder Penrose said it was true that no people had more love or reverence for the life of Christ than the Latter-day Saints. Many of the Christian sects do not realize this, and are inclined to believe that the Mormon church is without the impression of the Latter-day Saints.

He said that the Latter-day Saints are trying to dispel. We have hundreds of missionaries in the world proclaiming the true position of this people.

Latter-day Saints believe that Christ was the son of Mary, but not of Joseph. The Saints believe that he was born of a virgin, and that he was the firstborn. All revelations come through Christ. He was with the Father in the beginning, and he was the Father in the beginning.

He was the Father in the beginning, and he was the Father in the beginning. He was the Father in the beginning, and he was the Father in the beginning.

He was the Father in the beginning, and he was the Father in the beginning. He was the Father in the beginning, and he was the Father in the beginning.

He was the Father in the beginning, and he was the Father in the beginning. He was the Father in the beginning, and he was the Father in the beginning.

He was the Father in the beginning, and he was the Father in the beginning. He was the Father in the beginning, and he was the Father in the beginning.

He was the Father in the beginning, and he was the Father in the beginning. He was the Father in the beginning, and he was the Father in the beginning.

He was the Father in the beginning, and he was the Father in the beginning. He was the Father in the beginning, and he was the Father in the beginning.

He was the Father in the beginning, and he was the Father in the beginning. He was the Father in the beginning, and he was the Father in the beginning.

He was the Father in the beginning, and he was the Father in the beginning. He was the Father in the beginning, and he was the Father in the beginning.

He was the Father in the beginning, and he was the Father in the beginning. He was the Father in the beginning, and he was the Father in the beginning.

He was the Father in the beginning, and he was the Father in the beginning. He was the Father in the beginning, and he was the Father in the beginning.

He was the Father in the beginning, and he was the Father in the beginning. He was the Father in the beginning, and he was the Father in the beginning.

He was the Father in the beginning, and he was the Father in the beginning. He was the Father in the beginning, and he was the Father in the beginning.

He was the Father in the beginning, and he was the Father in the beginning. He was the Father in the beginning, and he was the Father in the beginning.

He was the Father in the beginning, and he was the Father in the beginning. He was the Father in the beginning, and he was the Father in the beginning.
